PROJECT

E-commerce website with linebot and Oa 2025

USING : Nuxtjs,Vue,Git, SourceTree

- Developed an e-commerce website for solar panel trading with Line bot to send PO to store when user buy solar panel
- Line Oa for communication with buyer

Line Chatbot and Web for label pharmaceutical labels 2024

USING : Python/PHP/JavaScript

- Developed a LINE chatbot to summarize drug labels submitted by users, providing usage instructions, warnings, and indications to help users better understand how to use the medication.
- Utilized Google Vision API to extract text, then processed it with Gemini API to summarize usage, warnings, and indications. Additionally, implemented image analysis to classify packaging types (box, bottle, sachet) and Converted images to Base64 and stored metadata in MySQL database for further labeling.
- Built a web interface for managing labels and exporting data as XML and YOLO for AI training.

Thai FDA Number Validator 2024

USING : C#/Dotnet 8/SQL

- Developed a web application using C# and .NET 8 to accept user-uploaded images and analyze them via ChatGPT API to extract FDA registration numbers
- Integrated a custom-built SearchFDA API to fetch related product information based on the extracted number and display results on the web in real-time
- Stored all search history and results in a SQL Server database for user history tracking

EXPERIENCE

AHEAD COMPANY LIMITED (Internship)

Full-stack web Developer

April 2024 - July 2024

- Involved in company-assigned projects
